EDUCATION

Systems Analyst – ARG : Res. 6790/19
3-year program

Instituto Argentino de la Empresa (HILET) March 2022 – December 2024

- High understanding of programming logic.
- Excellent knowledge of computer architecture, networks, and how they work.
- Strong teamwork skills and experience with tools like GIT, SCRUM, Trello, etc.
- Technologies used: JavaScript, C#, JAVA, PHP, C++, C, PASCAL, SQL with SQL Server, MySQL, and data analysis.

ABOUT ME

My name is Brandon Alan Carabajal, I am 25 years old and I live in Mar del Plata, Buenos Aires, Argentina. I am a programmer with 3 years of experience, creating applications using various tools such as .NET, React, and other programming languages. I am also a graduate of the university degree program "Systems Analyst," where I acquired a wide range of both soft and hard skills.

WORK EXPERIENCE

Final Exam Registration Web Application

Instituto Argentino de la Empresa (HILET)
January 2024 – December 2024

Academic project that allows students to register for final exams in their subjects and enables administrative staff to manage those exams.
I developed the user interface using ReactJS, the backend with C# .NET 8, connected through an ASP.NET RESTful API, and the database using SQL Server.
Methodology applied with the team: SCRUM

Desktop Administration Application

Art Workshop "Finca Sagrado Corazón"
February 2023 – July 2023

I designed and developed a desktop application to manage the operations of an art workshop, including student, course, and materials management.
Implemented Create, Read, Update, and Delete (CRUD) functionalities using WPF for the user interface and Microsoft SQL Server for the database.
The project covered everything from database design to implementation and application testing.

3 Years of Personal Project Development

Technologies I have worked with:
Backend :
C# .NET 8, ASP.NET (RESTful API), NodeJS, NextJS, PHP, JAVA, Spring Boot, SQL Server, PostgreSQL, MySQL, MongoDB, Docker, Kubernetes.
FrontEnd :
HTML, CSS, JavaScript, ReactJS, Angular, TailwindCSS.
Testing & Security :
JWToken, Auth0, Postman, Insomnia, C# Unit Testing.
